

Pier Giorgio Righetti

piergiorgio.righetti@polimi.it

Prof. Righetti earned his Ph. D. in Organic Chemistry from the University of Pavia in 1965. He then spent 3 years as a Post. Doc. at MIT and 1 year at Harvard (Cambridge, Mass, USA). He is full professor of Proteomics at the Milan's Polytechnic.

He is in the Editorial Board of Electrophoresis, J. of Chromatography A, J. Proteomics, BioTechniques, Proteomics, Proteomics Clinical Applications. He has co-authored the book Hamdan M., Righetti P.G.: Proteomics Today Wiley-VCH, Hoboken, 2005, and published >700 scientific articles. He has developed isoelectric focusing in immobilized pH gradients, multicompartiment electrolyzers with isoelectric membranes, membrane-trapped enzyme reactors, temperature-programmed capillary electrophoresis and combinatorial peptide ligand libraries for detection of the low-abundance proteome.

On 667 articles reviewed by the ISI Web of Knowledge (Thomson Reuters), Righetti scores 17.897 citations, with an average of 26 citations/article and with a H-index of 59. Only in the last eight years (2005-2012) he has received citations ranging from 1000 to 1200 per year. He has won the CaSSS (California Separation Science Society) award (October 2006), at that time in its 12th edition, and the Csaba Horvath Medal award, presented on April 15, 2008 by the Connecticut Separation Science Council (Yale University). In 2011, he has been nominated honorary member of the Spanish proteomics society and in 2012 he has won the prestigious Beckman award and gold medal granted in February at the Geneva MSB meeting.
